March 27, 2006

**Change Notification No: 10956**

**Subject: Legerity Discontinuance Notice – VoicePath Demo Kit (Le71HK0001)**

**Description of Change:**

Legerity is announcing the discontinuance of the VoicePath Demo Kit (Le71HK0001) and is replacing it with the Universal VoicePath Development Platform (Le71HK0002).

**Reason for Change:**

The reason for upgrading from the VoicePath Demo Kit to the Universal VoicePath Development Platform is to provide a single demonstration and development platform for all of Legerity VoicePath products, including VeriVoice Auditor and Professional Test Packages.

**Application Impact:**

The original VoicePath Demo Kit has been provided for demonstration purposes. The new Universal VoicePath Development Platform demonstrates device functionality and allows initial software development using Legerity devices and API-II Software.

**Replacement Parts:**

The recommended replacement is Le71HK0002, the Universal VoicePath Development Platform.

**Last Support Date: March 27, 2006**

The VoicePath Demo Kit is no longer being supported.

**Products Affected by this Change:**

Le71HK0001  
Le71HP0200

This change to the demo boards has no direct impact on the semiconductor end products themselves.

Full demonstration and development capability for the Ve580 and Ve770 is not yet supported on the Universal VoicePath Development Platform. The Universal VoicePath Development Platform only supports scripting capability for these device families.
